DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Torres-Isea.

Torres-Isea in fig. 1 discloses an actuator comprising a resilient shape memory member 10, a magnetic body 14, and a magnetic field generator 12, said magnetic body being attached to an end of said resilient shape memory member, such said magnetic field generator is stationary while the magnetic body is movable, whereby said movable member is moved by a magnetic field provided from said magnetic field generator (col. 3, lines 8-30); wherein at least an upper part of said resilient shape memory member is covered with said magnetic body.

Allowable Subject Matter

3. Claims 5-13, 15, 18-23 are allowed.
4. The following is a statement of reasons for the indication of allowable subject matter: None of the prior art of record taught or reasonably suggested an actuator comprising a pair of ring-shaped magnetic bodies, a movable member disposed between said magnetic bodies movably in an axial direction, a magnetic field generator

provided in said movable member, a pair of resilient shape memory members each disposed between said movable member and each magnetic body.

Conclusion

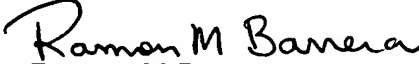

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited prior art disclosed actuators having both magnetic and shape memory members.
